

A NEW REALITY

1.5 METER DISTANCING.

Let's do this together.

Since March 2020 we live in a new world. This means we have to adjust our way of living. We have to think about new rules to guarantee your and our safety. In this protocol we explain 'the new normal' within Impact Hub Amsterdam.

Let's do this together!

How this plan works

This plan is build upon the **four pillars given by the Dutch Government** to build an operational protocol. (Keep your distance, Hygiene, Safety rules, Behavioural adjustments)

We will explain our **specific approach** to all four pillars. During the implementation of the measures, Impact Hub Amsterdam will work closely together with our cleaning agency and KIT.

Keep your distance.

01. Always keep **1.5 meter distance** from each other

02. Create your own working space for the day and **minimize your movement** throughout the building.

03. Never exceed the **maximum amount of people in the space.**

Hygiene.

01. All our spaces are provided with disinfectants so you can **clean your workspace** before and after usage.

02. Frequently used **touch points will be cleaned** multiple times per day by KIT.

03. The **community kitchen will be hosted by Impact Hub.** For more information about the adjustments ask the host.

Safety rules.

01. If the **maximum amount of people** is exceeded in the space, Impact hub is allowed to deny access.

02. If people in the space show **symptoms**, such as coughing or sneezing, Impact Hub is allowed to deny access.

03. We keep **updating our safety rules** according to the Dutch government.

Behavioural adjustments.

01. Where possible we will create **one way directions** to avoid busy crossing points.

02. Use the Impact Hub **entrance** to enter and use the SDG House 'entrance' to **exit** the building.

03. Please take **responsibility** for yourself and the space.

THANK YOU.
